SMMT, the 'S' symbol and the 'Driving the motor industry' brandline are trademarks of SMMT Ltd.

The Society of Motor Manufacturers and Traders (SMMT)

The Society of Motor Manufacturers and Traders (SMMT) is one of the largest and most influential trade associations in the UK, supporting and promoting the British automotive industry to government, stakeholders and the media at home and abroad while engaging with organisations worldwide.

The Aftermarket Section is one of the SMMT's largest areas of membership drawn from the independent sector for service and repair, including parts manufacturers and suppliers, importers, distributors, workshops and data providers.

SMMT is proud to be hosting the UK Pavilion at Automechanika Frankfurt, with 19 aftermarket companies representing the very best the sector in this country has to offer.

The importance of the aftermarket sector to the UK is significant. It contributes over £19 billion to the British economy, supports 365,000 jobs across 58,746 businesses and turns over some £66.9 billion every year – so there are clear opportunities to develop new business with UK based companies.

Please join us on the UK Pavilion for a networking reception (Hall 5.1 Stand E77) on Tuesday 10 September at 4pm.

I wish you a busy and successful Automechanika Frankfurt.

Ruta Aisthorpe Director of Global Operations and Partnerships

71 Great Peter Street, London, SW1P 2BN

SMMT Quality Management

Formerly SMMT Industry Forum, SMMT Quality Management (SQM) has been helping organisations improve quality, performance and competitiveness since 1996. Established through a collaboration between leading Japanese automotive manufacturers and the UK Government, SQM was created to strengthen manufacturing capability and drive world-class standards across industry.

Today, SQM delivers training, consultancy and operational improvement services across automotive, aerospace and advanced manufacturing sectors worldwide. As the UK Oversight Office for IATF 16949 certification and the UK's licensed VDA partner, SQM plays a vital role in supporting globally recognised automotive quality standards.

Over the past three decades, SQM has trained more than 25,000 professionals in over 30 countries and supported improvement programmes for organisations ranging from SMEs to global manufacturers, including Rolls-Royce, Jaguar Land Rover and Bentley Motors.

Through practical, results-focused expertise, SQM helps organisations achieve measurable, sustainable improvements that strengthen capability, resilience and long-term success.

Infor

Driving Performance Across the Automotive Aftermarket and Supply Chain

Infor is the industry cloud-complete company for automotive. Powered by AWS and built on Infor OS, our purpose-built solutions help OEMs, tier suppliers, and independent aftermarket brands move faster, respond with agility, and compete with confidence. Our ERP and industry applications connect the full vehicle lifecycle – from engineering change and quality to supplier orchestration and aftermarket parts management – helping teams simplify complexity, protect margins, and deliver stronger service levels.

Why Infor for the automotive aftermarket?

- Industry-specific, multi-tenant cloud solutions built to scale with vehicle complexity, parts proliferation, and growing aftermarket demand
- End-to-end visibility across engineering, suppliers, manufacturing, warehousing, and aftermarket operations
- Embedded AI and automation that help turn operational data into smarter decisions and optimised execution
- Faster time to value with pre-built automotive industry processes and accelerated implementation
- Backed by Koch Industries and 18,000 experts, Infor is trusted by leading automotive brands including Aston Martin, Triumph Motorcycles, Nedschroef, and WAI Global.

Allmakes 4x4 Limited

Allmakes 4x4 is a UK-based, leading independent wholesaler of parts and accessories for Jaguar and Land Rover vehicles. We provide exceptional value through a comprehensive range of OE, OEM, and high-quality aftermarket products, supporting a wide variety of customer needs across global markets.

Our portfolio includes trusted in-house brands such as Terraforma and PROEVO+, alongside a broad selection of carefully sourced products from leading manufacturers. This allows us to offer flexible solutions that meet different budgets, performance requirements, and application demands.

We work closely with our suppliers and continuously monitor and assess product quality to ensure consistent reliability, durability, and performance. With a strong focus on availability and quality assurance, Allmakes 4x4 is committed to delivering dependable solutions that keep Land Rover and Jaguar vehicles performing at their best, both on and off the road.

ENERGENICS

Energenics Europe Ltd

Based at the University of Oxford's Begbroke Science Park, Energenics is a UK company which has been engaged in nanomaterials research since 1999, with expertise in research, development, production and commercialisation of nanomaterials.

Originally spun out from Oxford University, we have a strong track record in discovery and commercialisation of novel products to address environmental challenges.

For over 15 years, Envirox™ Fuel Borne Catalyst (FBC) technology has been trusted by leading aftermarket fuel additive brands to deliver premium performance for DPF Cleaners and GPF Cleaners. It has also been used extensively in aftermarket DPF Fluids for on-board vehicle regeneration systems.

As well as DPF regeneration, Envirox™ fuel additives support diesel engine performance with benefits including:

- Reducing harmful emissions - including particulates (PM), hydrocarbons (HC) and carbon monoxide (CO).
- Saving Fuel - with the resulting savings in greenhouse gas emissions (CO2).
- Cleaning engines and exhaust systems, including turbochargers.

G3 Concepts

G3 Concepts Limited was founded in 2014 by three former test engineers of Honeywell Garrett Turbochargers with almost 60 years of combined test experience between them. Using our extensive knowledge and experience we have developed the high precision calibration tools specially for the turbocharger re-manufacturer industry. They are designed to accurately measure the flow through the VGT mechanisms and verify that they are set to the OEM factory setting, giving you the opportunity to adjust the critical minimum-flow stop to the correct setting before the turbocharger leaves your workshop.

AUTOMOTIVE PRODUCTS OF EXCELLENCE
SINCE 1946

Ivor Searle Limited

Remanufactured engines & gearboxes from Ivor Searle.

Ivor Searle is a leading European producer of quality remanufactured engines and gearboxes, and offers an all makes programme for cars and vans. The Ivor Searle product range covers over 90% of the European vehicle parc. Remanufactured products offer workshops a more sustainable choice, as considerably less energy and materials are used in the remanufacturing process.

All Ivor Searle engines and gearboxes are covered by a 12-month unlimited mileage parts and labour warranty. Ivor Searle holds comprehensive stocks across all product lines to minimise vehicle downtime. Delivery direct from the UK, or delivery from one of Ivor Searle's European partners, is also available. All Ivor Searle engines are built to OEM specifications in accordance to BS AU257:2002, and gearboxes are remanufactured under a quality management system certified to ISO 9001:2015.
